SUMMARY

Industrial fabrics are designed and engineered to be used in products, processes, or services where functional requirement trump the aesthetic form commonly considered the realm of textiles. They are used by non-apparel industry professionals for challenging and high-performance applications. Industrial fabrics can be a component part of another product in order to alter the strength, performance and other properties of that product. They can also be used in product manufacturing or used alone to perform one or several specific functions. Industrial fabrics differ from textile (apparel) fabrics in several ways.
