### SUMMARY

An industrial display is a display used in an industrial control process or device. Its main difference with the civilian or commercial display is the shell design is generally more durable than the common display used in the civilian or commercial fields, the type of materials used to make these panels are divided into ordinary iron, stainless steel, aluminum and many others. There are also special designs, like industrial-grade LCD screen, is specifically engineered to cater to the higher environmental requirements, these industrial-grade LCD screen can tolerate a very wide temperature range, -40 to 85 Celsius degrees, only a few foreign manufacturers produce such displays, the price is, therefore more expensive. The degree of protection of industrial displays is indicated by IP , the first one being the dust-proof rating and the second being the waterproof rating. Dustproof rating up to 6, waterproof up to 8.
