Summary

Infusion therapy is prescribed to patient only when patient condition is severe or oral medication are less effective. Infusion Pharmacy includes infusion of antibiotic, antifungal, antiviral, pain management and nutritional drug through needle or catheter. Diseases such as cancer, diabetes, gastrointestinal disorder and pain related disorders are generally treated with infusion medication system. Infusion pharmacy can also be administered in home by providing doorstep services. Home infusion pharmacy management is more costly than hospital infusion pharmacy management because it requires more skilled nursing facilities.
