## Abstracts

### Summary

Individual quick freezing (IQF) is one of the major technology used to keep variety of fruits, vegetables, meat, poultry and sea food products fresh for longer duration and to streamline the supply chain of these with rare chances of loss or damage to the stored products. IQF or individual quick freezing is the process of quickly freezing each unit of product separately, by using cold air that is blown at a high speed on a fluidized bed. Products that are frozen using IQF technology have better flavor, texture and are more nutritious than product frozen with different methods.
