SUMMARY

Location analytics blends business data with geographic data to reveal the relationship of location to people, events, transactions, facilities and assets. Traditionally, location data has been relegated to mapping and GIS purposes. But geo-mapping software, like other business software, has become easier to use. And BI and analytics software vendors are integrating mapping and spatial data analysis into their products to provide additional context to visualizations, reports and analysis. Location analytics is the process or the ability to gain insight from the location or geographic component of business data.

The report forecast global Location Analytics market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025.
