SUMMARY

Non-stick pan is a type of pans with non-stick surface or coatings, which is engineered to reduce the ability of other materials to stick to it. For non-stick cookware, the non-stick coating allows food to brown without sticking to the pan. Non-stick is often used to refer to surfaces coated with polytetrafluoroethylene (PTFE), a well-known brand of which is "Teflon." With the health concerns centered on PTFE in recent years, Ceramic coatings are developed as a newer material in the world of nonstick cookware. It's widely considered to be the safest and most environmentally friendly option. Ceramic is free of PTFE and PFOA (more on PTFE and PFOA below).'
