### SUMMARY

NOR flash memory is a non-volatile storage technology. Its main differentiating factor over NOR Flash memory is that it can perform without the need for any external power source. Machine instructions can be run directly from the chip and also retrieved using NOR flash memory. It contains several address pins that provide access to every byte of information available in the chip. NOR flash memory is not only faster but also more expensive compared to NOR Flash. NOR flash memory is most often deployed in cellphones

The report forecast global NOR Flash market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025.

The report offers detailed coverage of NOR Flash industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading NOR Flash by geography. The report splits the market size, by volume and value, on the basis of application type and geography.

First, this report covers the present status and the future prospects of the global NOR Flash market for 2015-2025.
