Summary

A pacifier is an article with a nipple, intended for a young child to suck on, but that is not designed to help a baby obtain fluid. A pacifier usually has a guard or shield at the base of the nipple that keeps the pacifier from being sucked completely into a child's mouth. It also has a handle or ring, usually on the opposite side of the guard or shield from the nipple, which is used to hold or grasp the pacifier.
