SUMMARY

Panel saw is a machine with a sliding table which is used to cut large sheet materials into smaller rectangular sections and pieces, often as part of an initial sizing process. It consists of a circular saw and an upright framework that supports the work piece and a track that the circular saw travels along. Unlike a table saw where the work piece is moved past the cutting blade, with a panel saw the operator moves the circular saw across the work piece, with the work piece fixed in place.

The report forecast global Panel Saw market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025.

The report offers detailed coverage of Panel Saw industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Panel Saw by geography. The report splits the market size, by volume and value, on the basis of application type and geography.

First, this report covers the present status and the future prospects of the global Panel Saw market for 2015-2025.
