SUMMARY

Peony is a flowering plant in the genus *Paeonia*, the only genus in the family *Paeoniaceae*. Peony varieties with huge, double flowers will be the focal point of the garden when they bloom in early summer. Single-flowered types are more subtle and combine well with other perennials. Flower colors include pink, red, white, and yellow, and the plants grow 18 inches to 3 feet tall, depending on the variety. Peonies make an attractive low hedge. However, they can take up to 3 years to mature, and don't perform well in hot summer climates.

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
