SUMMARY

Phloretin is a white powder solid. Phloretin is a dihydrochalcone, a type of natural phenols. The formula of phloretin is C₁₅H₁₄O₅. It can be found in the roots and peels of juicy fruits like apple and pear. Phloretin can be widely used as antioxidant and moisturizing factor in cosmetics. Phloretin is also widely used in food industry and pharmaceutical industry. Phloretin can be produced as different grades based on the content of phloretin. 98%, 80%, 70% are common grades of phloretin product. Phloretin can also be produced as low grade products such as 5% phloretin. However, 98% phloretin is the most common grade of product which can be widely used in cosmetic and food industry. In our report, all phloretin products are converted to 98% phloretin powder.

The report forecast global Phloretin market to grow to reach xxx Million USD in 2019 with a CAGR of xx% during the period 2020-2024.

The report offers detailed coverage of Phloretin industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Phloretin by geography. The report splits the market size, by volume and value, on the basis of application type and geography.

First, this report covers the present status and the future prospects of the global Phloretin market for 2015-2024.
