Summary

Plastic Bandages is a piece of plastic material used either to support a medical device such as a dressing or splint, or on its own to provide support to or to restrict the movement of a part of the body. It protects the wound and scab from friction, bacteria, damage, and dirt. Thus, the healing process of the body is less disturbed. Some of the dressings have antiseptic properties. An additional function is to hold the two cut ends of the skin together to make the healing process faster. Plastic Bandages mostly is adhesive bandages.
