SNAPSHOT

Polyphenylsulphone (PPSU) is an amorphous plastic. This material combines a high melting temperature with quite a low moisture absorption. Furthermore, it has better impact strength and chemical resistance than PSU and PES from the polysulphone group. Apart from these characteristics, PPSU can be better sterilized with superheated steam than other members of this group of polymers, and is resistant to detergents and disinfectants.

The global PPSU market size is estimated at xxx million USD with a CAGR xx% from 2015-2019 and is expected to reach xxx Million USD in 2020 with a CAGR xx% from 2020 to 2025. The report begins from overview of Industry Chain structure, and describes industry environment, then analyses market size and forecast of PPSU by product, region and application, in addition, this report introduces market competition situation among the vendors and company profile, besides, market price analysis and value chain features are covered in this report.
