## Abstracts

### Summary

Working in any type of industrial environment can pose potential risks to employees' vision. Machinery, chemicals, sparks or metal fragments can damage eyes irreparably. Safety glasses help keep eyes safe out in the field, on construction sites, in labs and in any other place where eyes may come in contact with foreign materials. Safety eyewear must conform to a higher standard of impact resistance than regular eyeglasses, which optical professionals sometimes call "dress eyewear."

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
