SNAPSHOT

3D cell culture is an artificially-created environment in which biological cells are permitted to grow or interact with their surroundings in all three dimensions. Unlike 2D environments, a 3D cell culture allows cells in vitro to grow in all directions, similar to how they would in vivo.] These three-dimensional cultures are usually grown in bioreactors, small capsules in which the cells can grow into spheroids, or 3D cell colonies.

The global Scaffold Free 3D Cell Culture market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
