SUMMARY

Smart home appliances are devices or machines which can be controlled by tablets or smartphones remotely. Statistics covered in this report includes Smart Air-Con and Heater, Smart Washing and Drying, Smart Fridges, Smart Large Cookers, Smart Dishwashers and others. The utilizing of modern computer and communications technology makes functions faster, cheaper and more energy-efficient. The appliances can take advantage of an energy "smart grid," being implemented by utility companies. When the smart grid technology is finally implemented, all smart home appliances can tap into the smart grid power source.

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
