## Abstracts

### SNAPSHOT

This report studies the Tailgating Detection market. A tailgate detection system offers an additional level of security for your facility during staffed or non-staffed hours. Today's access control systems are designed to help control and manage authorized access into secure areas. Ensuring that every individual has properly presented a valid ID or successfully cleared biometric identification is a major challenge that security professionals face. The prevention of tailgating and piggybacking (in other words, cheating or outsmarting the system) is a problem existing solutions do not sufficiently address
