SNAPSHOT

CTP refers to the process of imaging digital printing data (created by a computer) directly onto a printing plate. A thermal CTP recorder uses a high-power near-infrared laser to image digital printing data onto specially processed aluminum-base printing plates. CTP completely eliminates the need for film output and subsequent film to plate image transfer. Since processing is completely digital, there are no variations between plates, which results in superior printing quality.
The global Thermal CTP market size is estimated at xxx million USD with a CAGR xx% from 2015-2019 and is expected to reach xxx Million USD in 2020 with a CAGR xx% from 2020 to 2025. The report begins from overview of Industry Chain structure, and describes industry environment, then analyses market size and forecast of Thermal CTP by product, region and application, in addition, this report introduces market competition situation among the vendors and company profile, besides, market price analysis and value chain features are covered in this report.

Product Type Coverage (Market Size & Forecast, Major Company of Product Type etc.):
