SUMMARY

Thickeners are substances added to solutions to increase the viscosity of the liquid without significantly affecting its taste and other properties. The type and quantity of thickener depends on the nature of the final product. Thickeners are usually grouped as food-grade thickeners and non-food grade thickeners. They are further segmented on the basis of raw material into mineral thickeners and hydrocolloid thickeners. Mineral thickeners such as clay and silica and hydrocolloid thickeners such as starches, gums, cellulose, gelatin, pectin, and carrageenan are covered in this report.

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
