SNAPSHOT

Though there are several different Tipper designs, the basic components of Tippers remain more or less the same for all of them. The main body of the Tipper is generally based on that of a flatbed truck, with one axle beneath the cab and anywhere from one to three axles beneath the dump box. The dump box itself generally has a tailgate that is hinged at the top so that it will open automatically when it is being dumped. The dumping mechanism is powered hydraulically in order to prevent compression problems that can sometimes be encountered when using pneumatic systems. The engine of the Tipper can be either gasoline-powered or diesel-powered, but is generally a large internal combustion engine regardless of the fuel type used.

The global Tipper market size is estimated at xxx million USD with a CAGR xx% from 2015-2019 and is expected to reach xxx Million USD in 2020 with a CAGR xx% from 2020 to 2025. The report begins from overview of Industry Chain structure, and describes industry environment, then analyses market size and forecast of Tipper by product, region and application, in addition, this report introduces market competition situation among the vendors and company profile, besides, market price analysis and value chain features are covered in this report.

Product Type Coverage (Market Size & Forecast, Major Company of Product Type etc.):

On-Road Tipper

Off-Road Tipper

Company Coverage (Company Profile, Sales Revenue, Price, Gross Margin, Main Products etc.):

JAC

Sinotruk

Volkswagen

Caterpillar

Weichai

PACCAR
