SUMMARY

The erosion and corrosion of wind towers and blades is not a surprise given the variety of and often harsh environmental conditions encountered at sea and on land. If not protected, this erosion and corrosion will reduce the structure's strength, reliability, life span and, ultimately, its economic value. So coating plays an important role in protecting blades, tower and other components from environment.

The global Wind Power Coating market will reach Volume Million USD in 2019 and with a CAGR xx% between 2020-2026.
