Date: November 2017

Pages: 29

Price: US\$ 800.00 (Single User License)

ID: G88103E4128EN

Abstracts

SNAPSHOT

A wrist dive computer is the one that can take depth and time information and applies it to a decompression model to track the dissolved nitrogen in your wrist tissue during a dive. Your computer continuously tells you how much dive time you safely have remaining. Your computer combines a depth gauge, timer and sometimes a submersible pressure gauge (SPG) into a single, useful instrument. This is immensely useful when it comes to avoiding decompression sickness.

This report covers Wrist Dive Computers basic market data by segment:

- 1 by Product
- 2 by End-User
- 3 by Company
- 4 by Region
- 5 by Channel
- 6 by Price

This report can also be customized according to further requirements.
