## Abstracts

An Alkaline Water Ionizer (also known as a water ionizer) is a home appliance which claims to raise the pH of drinking water by using electrolysis to separate the incoming water stream into acidic and alkaline components.

Since the increasing number of proponents claim that consumption of the alkaline stream results in a variety of health benefits, making it similar to the alternative health practice of alkaline diets, along with it became available in the U.S. and Europe, according to research, the global Alkaline Water Ionizer market is projected to register a CAGR of 3.2% during 2017-2021.

On the basis of geography, the machines originally became popular in Japan and other far eastern countries before becoming available in the U.S. and Europe. The Asia Pacific is expected to hold the largest market of Alkaline Water Ionizer, and region followed by North America and EU, North America is expected to grow at the highest CAGR for the forecast period.

In terms of application, water ionizers are often marketed on the basis of health claims which are normally focused on their putative ability to make water more alkaline. A wide variety of benefits have been claimed, including the ability to slow aging, prevent disease, offer protection from nuclear fallout, give the body more energy, and offset the effects of acidic foods.

Global top manufacturers operating in Alkaline Water Ionizer market are Air Water Life, BlueQQ, Tyent USA, Pure Hydration, Bawell, Invigorated Living, NewCell, Invigorated Water, Bioexcel, Webetop, Lake Industries, Zen Water Systems among others.
