Abstracts

An Automotive fan clutch is a thermostatic device that exists as an integral component of certain automotive cooling systems. When the engine is cool or even at normal operating temperature, the fan clutch partially disengages the engine's mechanically driven radiator cooling fan, generally located at the front of the water pump and driven by a belt and pulley connected to the engine's crankshaft.

The key drivers attributing to this market growth is the increasing global demand for automotive, which result in rising demand for the Automotive Fan Clutch, worldwide automobile production exceed 92 million in 2016, and 94 million automobiles expected be produced in 2017; some 70.1 million cars were produced worldwide and about 23.2 million such vehicles were produced globally in 2016, according to research, the global Automotive Fan Clutch market is projected to register CAGR of 5.9% between 2017 and 2021.

Geographically, the Asia Pacific is expecting to grow at highest CAGR over the forecast period as their they are the largest production region and demand region in terms of volume by 2016, region followed by North America, which is projected to register CAGR of 5.6% over 2016-2020. Base on country, China is projected to remain the fastest growing market for Automotive Fan Clutch in Asia Pacific and across the world during the forecast period.

Base on type, most fan clutches are viscous or "fluid" couplings, combined with a bi-metallic sensory system similar to that in a thermostat. Some clutches are electronically controlled (instead of bi-metallic strip).

Global top manufacturers operating in Automotive Fan Clutch Market are Hayden, Aisin,

HYTEC, Eaton, GMB, NRF, AIRTEX, Horton among others.

In the context of China-US trade war and COVID-19 epidemic, it will have a big influence on this market.
