Abstracts

Biomass Moulding Fuel is an industry term for getting energy by burning wood, and other organic matter. Biomass most often refers to plants or plant-based materials that are not used for food or feed, and are specifically called lignocellulosic biomass. As an energy source, biomass can either be used directly via combustion to produce heat, or indirectly after converting it to various forms of biofuel. In the context of China-US trade war and COVID-19 epidemic, it will have a big influence on this market.
