## Abstracts

Cyclohexane is a cycloalkane with the molecular formula  $C_6H_{12}$  (the alkyl is abbreviated Cy). Cyclohexane is mainly used for the industrial production of adipic acid and caprolactam, which are precursors to nylon. Cyclohexane is a colourless, flammable liquid with a distinctive detergent-like odor, reminiscent of cleaning products.

The growing population results in increasing consumption of nylon, and the increasing use in 3D printing is positively driving the growth for the cyclohexane and its products. According to research, the global Cyclohexane market is projected to grow at a CAGR of 5.8% through 2018-2022, and reach total revenue of 26.5 billion USD by 2022.

Base on applications, the Cyclohexane is widely used in nylon industry as a precursor. In 2017, nylon industry application held the highest market share and expected to maintain the trend over the forecast period. Application followed by Laboratory solvent and other niche uses, which accounted for about 10% of market share in 2017.

Geographically, Asia Pacific is expected to grow at the highest CAGR for the forecast period, also the Asia Pacific is expected to hold the largest market of Cyclohexane in terms of consumption due to the growing urbanization and infrastructural growth in the region demands nylon in various sectors, which directly driving the demand for Cyclohexane. Region followed by North America.

In the context of China-US trade war and global economic volatility and uncertainty, it will have a big influence on this market. Cyclohexane Report by Material, Application, and Geography – Global Forecast to 2025 is a professional and comprehensive research report on the world's major regional market conditions, focusing on the main regions (North America, Europe and Asia-Pacific) and the main countries (United

States, Germany, United Kingdom, Japan, South Korea and China).

The report firstly introduced the Cyclohexane basics: definitions, classifications, applications and market overview; product specifications; manufacturing processes; cost structures, raw materials and so on. Then it analyzed the world's main region market conditions, including the product price, profit, capacity, production, supply, demand and market growth rate and forecast etc. In the end, the report introduced new project SWOT analysis, investment feasibility analysis, and investment return analysis.
