## Abstracts

In this era, consumers are mainly promoting packaging choices for consumer products. There are many reasons, such as the high focus on sustainability and the rise of e-commerce. As the retail environment continues to change, food and beverage packaging must leave room for these changes to maintain brand integrity.

In addition, selling to a strong customer base is a challenging business. There has never been a generation of people in the world who are so concerned about healthy eating. They take out their smartphones to read reviews, look for ingredients, and look for the background story of an organization or brand.

Therefore, for end users, it is not surprising that a better style appears on food packaging, not only shows the internal content, whether organic or non-organic, but also shows the external content. The demand for food manufacturers to provide brand information in a way that is easy to understand, clear and environmentally friendly is stronger than ever.

The Food and Beverage Packaging Supplier of Choice Work with Plastic Packaging Technologies (PPT) for superior food and beverage flexible packaging.
