## Abstracts

Handmade soaps are usually made in small batches using traditional methods and plant-based ingredients. You won't find huge "handmade soap" factories out there. Because they are made in small quantities they are fresh and can be made from seasonal ingredients. Handmade soaps are high in glycerin. Glycerin is a neutral, sweet-tasting, colourless emollient and when mixed with water it will soften and moisturise your skin. It has a natural antiseptic quality and because it is so gentle it is especially good for tender skin and children.

The global handmade soap market is projected to reach about USD 5.0 billion by 2021, growing at a CAGR of 6.4% in the next five years. In terms of region, handmade soap markets in North America and Europe have been matured, Asia-Pacific region is expected to be the fastest growing market of handmade soap, especially in China.

Currently appearing on the market of some handmade soaps brands are DHC, L'OCCITANE, Baseformula, Gamila Secret, Herborist, Forest Cabin etc..

Handmade Soap Report by Material, and Geography – Global Forecast to 2023 is a professional and comprehensive research report on the world's major regional market conditions, focusing on the main regions (North America, Europe and Asia-Pacific) and the main countries (United States, Germany, United Kingdom, Japan, South Korea and China).
