Abstracts

The increasing renal failure patients and geriatric population globally are the key drivers to fuel the growth for the Hemodialysis Machines market, according to research, global Hemodialysis Machines is projected to grow at a CAGR of 5.6% over 2016-2020.

Hemodialysis often involves fluid removal (through ultrafiltration), because most patients with renal failure pass little or no urine. Side effects caused by removing too much fluid and/or removing fluid too rapidly include low blood pressure, fatigue, chest pains, leg-cramps, nausea and headaches. These symptoms can occur during the treatment and can persist post treatment; they are sometimes collectively referred to as the dialysis hangover or dialysis washout.

In terms of geography, the Asia Pacific is largest demanding market around the world, which is also expected to remain the 6.9% growth rate for the forecast period as their increasing geriatric population and largest population; region followed by Americas, which is projected to grow at a 5.7% CAGR between 2016-2020.

Asia Pacific region is the fastest growing region due to growing number of ESRD patients, increasing healthcare expenditure, increasing awareness of healthcare, and refining healthcare infrastructure in the emerging countries, such as India and China.

Global top players in Hemodialysis Machines market include are Asahi Kasei Corp., B. Braun Melsungen AG, Baxter International, Inc., Fresenius SE & Co. KGaA, JMS Co. Ltd., Kawasumi Laboratories, Nikkiso Co., Ltd., Nipro Corporation, NxStage Medical Inc. and Toray Industries Inc.
