Abstracts

Tempered glass is a type of safety glass processed by controlled thermal or chemical treatments to increase its strength compared with normal glass. Tempering puts the outer surfaces into compression and the inner surfaces into tension. Such stresses cause the glass, when broken, to crumble into small granular chunks instead of splintering into jagged shards as plate glass creates. The granular chunks are less likely to cause injury.

The growing demand for automobile and construction are the main drivers to fuel the growth for the Tempered Glass market around the world, according to a brand new research, the global Tempered Glass market is expected to hit USD 48.6 billion by 2020.

In terms of geography, the Asia Pacific is dominating the market as rising automobile industry, particularly in emerging economies of Asia Pacific including India and China, is expected to augment product market over the forecast period. However, rising use of laminated glass for automobile manufacturing on account of properties such as lightweight and anti-breakage is expected to challenge industry growth over the next five years.

Europe market is expected to witness below average rate growing at a CAGR of over 4.1% from 2016 to 2020. In Europe, the product is mandated for use in applications including safety glazing, fire knock-out panels, all-glass entrances and storefronts, extreme wind loads and fireplace enclosures.

The global top manufacturers are Saint-Gobain, AGC Group, Guardian Industries, NSG Group, Duratuf Glass Industries, Xinyi Auto Glass, GSC Glass Ltd, Schott AG,

Independent Glass Co, Guardian Industries, Saint-Gobain, Dillmeier Glass Company among others.
