Abstracts

The global antihyperlipidemic drugs market accounted for \$9,456 million in 2018, and is expected to reach \$16,864 million by 2026, registering a CAGR of 7.5% from 2019 to 2026.

Lipids are defined as the organic compounds that are fatty acids. These fatty acids are essential and serve as building blocks of the cellular membranes in the living organisms. However, surge in level of lipids in the blood leads to their deposition in the arteries. This deposition of the lipids in the arteries leads to blockage, which in turn increases the risk of heart attacks. Therefore, the condition requires early detection and treatment. The treatment of hyperlipidemia is carried out using antihyperlipidemic drugs. Some of the antihyperlipidemic drugs available in the market include statins, bile acid sequestrants, cholesterol absorption inhibitors, and others.

The factors that contribute for the growth of the market include surge in sedentary lifestyle. Furthermore, rise in incidence of disorders related to distributed cholesterol levels in the blood also contributes to the growth of the antihyperlipidemic drugs market. Moreover, surge in awareness regarding complications related with hyperlipidemia is another major factor that fuels the growth of the market. However, high cost of the treatment hinders the market growth. Conversely, growth opportunities exhibited by emerging economies is expected to offer lucrative opportunities for the market growth during the forecast period.

The antihyperlipidemic drugs market size is studied based on segments, drug class and region, to provide a detailed assessment of the market. Based on drug class, the market is divided into statins, pcsk9 inhibitors, bile acid sequestrants, cholesterol absorption inhibitors, fibric acid derivatives, and combination. Based on region, the antihyperlipidemic drugs market size is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, France, the UK, Italy, Spain, and rest of Europe), Asia-Pacific (China, Japan, India, Australia, South Korea, and rest of Asia-Pacific), and LAMEA (Brazil, South Africa, and rest of LAMEA).
