Abstracts

The report incorporates the study of the global automotive brake system market that focuses on technologies of brake system for different sales channels. Various technologies of automotive brake system are antilock braking system (ABS), traction control system (TCS), electronic stability control (ESC), and electronic brake-force distribution (EBD). Anti-lock braking system is mainly used to assist vehicles for safe braking and easy maneuvering in emergency situations. ABS hold a great potential in changing the safety of vehicles thus, making them safer and more comfortable. It is designed to be useful whenever a driver slams on brakes, particularly when road conditions are slippery or wet.
