Automotive Door Panel Market Overview:

Automotive door panel provides stylish, aerodynamic looks to the vehicle coupled with protection and safety to the passengers travelling within. Door panels typically combine style as well as functionality of entry/exit to the vehicle. These door panels can be electrically powered or operated manually. Traditionally, a car door panel is hinged at the front end owing to the benefit that it can be opened during the forward motion of the vehicle.

The global automotive door panel market is driven by increase in need for fuel efficiency, technological advancement, growth in demand for luxurious vehicles, and focus on well-being of drivers. However, growth in trade war, high automotive import tariffs, and rise in raw material prices restrict the market growth. Moreover, the untapped developing market in Asia and Africa, and advancement in vehicle infotainment system create lucrative growth opportunities for the market.

The global automotive door panel market is segmented into mode of operation, vehicle type, distribution channel, and region. Based on mode of transportation, it is categorized into front-hinged doors, rear-hinged doors, scissor door, gullwing doors, and sliding

door. Based on vehicle type, it is divided into passenger cars, LCV, and HCV. Further, passenger cars are classified into economical cars and premium cars. OEM and Aftermarket are the two distribution channels considered under the study. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Key players operating in the market are Grupo Antolin, Brose, Draexlmaier Group, HAYASHI TELEMPU CORPORATION, IAC Group, TS TECH, Kasai Kogyo, Reydel Automotive France SAS, TOYOTA BOSHOKU CORPORATION, and Yanfeng.
