Abstracts

Automotive panoramic sunroof is a large sunroof that is used to cover the entire roof of a vehicle and is significantly larger than the traditional sunroof. The panoramic glass sunroof uses more than one roof panel that opens above both the seats. It is also known as a multi-pane sunroof system, which tilts and slides open. Moreover, this is because multiple panes form one unit when closed and retracts upon slider track and stack when opened. It is majorly the operable fixed glass panel that consists of large panel size. Companies such as Webasto, Inalfa Roof System, and Nissan Maxima offer dual sunroof that is commonly known as panoramic sunroof.
