Abstracts

Consumers use decorative bathroom cabinets to create expansive space when a room is on the smaller side; however, these pieces of furniture are not just limited to the living room. Mirror cabinets now have been expanded to bathroom as well. Bathroom mirror cabinets provide storage area, and also acts as a bathroom vanity matching up with a variety of bathroom decor options.

The key factors that drive the growth of the bathroom cabinet market include growth of the real estate industry, increased in disposable income, and continuous product innovation. Moreover, customized solutions according to specific requirements and designs have created new opportunities for the growth of the bathroom mirror cabinets market. However, factor such as low durability of product due to rusting of material is expected to impede the market growth. Furthermore, novel innovations in aesthetics and introduction of sensors in bathroom mirror cabinets have gained huge traction in the recent years, which in turn are anticipated to create lucrative opportunities for the market expansion in the coming future.

The global bathroom mirror cabinets market is segmented on the basis of material, type, sales channel, and region. Depending on material, the market is bifurcated into steel and polymer. Based on type, it is studied across single door and multi-door. On the basis of sales channel, the global market is segmented into offline channel and online channel. Region wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA
