Abstracts

Beverage stabilizers can be defined as food additives that prevents degradation in beverages and help in maintaining consistency by keeping additional ingredients suspended in the solution for a longer period of time. Modified starch, pectin, carrageenan, casein inulin, and hydrocolloids are among the most commonly used beverage stabilizers. There is a substantial increase in the worldwide demand for beverage stabilizers in the recent decade. This growth has been governed by the performance quality and functionality of the products. The global beverage stabilizers market was valued at \$1,358.7 million in 2018, and is expected to garner \$1,938.2 million by 2025, registering a CAGR of 6.1% from 2018 to 2025. The xanthan gum segment was the highest contributor to the market, with \$360.2 million in 2017, and is estimated to reach \$611.0 million by 2025, at a CAGR of 6.6% during the forecast period.

The increase in the number of QSRs and the developments of the food & beverage industry majorly drive the growth of the global beverage stabilizers market. Moreover, there is an increase in the usage of beverage stabilizers due to the rise in the consumption of packaged and convenience goods around the world. This has also been a top impacting factor that fosters the demand for beverage stabilizers. However, volatile prices of raw materials used in the production of beverage stabilizers restrain the market growth. On the contrary, rise in consumption of functional beverages is

expected to make way for lucrative opportunities for the growth of the beverage stabilizers industry.

The report segments the global beverage stabilizers market into product type, beverage type, and region. Based on product type, the market is divided into gum Arabic, carboxymethyl cellulose, xanthan gum, carrageenan, pectin, and others.
