Abstracts

BFSI crisis management solution is the innovation & advancement in financial technology, which helps in dealing various types of incidents & emergency situations in the BFSI industry. Crisis management includes several technologies such as artificial intelligence, cloud computing, machine learning, and big data. Furthermore, BFSI crisis management serves as a modern program that makes a new approach by utilizing technologies and focuses on certain areas of business risk & protects the reliability & credibility of the financial institution network.

As crisis management solution providers have increased their focus toward improving financial services, risk mitigation & fraud detection, and cyber security, the demand for those solutions among the BFSI sector is continuing to rise in the market, thereby boosting the market growth. In addition, increase in dependency toward digitalization by financial institutions & rapid adoption of crisis management solutions among financial sectors are major factors that drive the market growth. However, lack of trust over

technologies for crisis management and complex management of network are some of the factors that hamper the market growth.

On the contrary, several banks and financial institutions are implementing & investing in BFSI crisis management solutions for their business processes to expand product lines, which is anticipated to offer lucrative opportunity for the growth of the market. In addition, untapped potential of emerging economies such as India, China, Singapore, and Japan, which are increasingly expanding their financial sectors is expected to boost the market growth in the coming years.

The BFSI crisis management market is segmented into component, deployment type, enterprise size, application, end user, and region. Depending on component, the market is bifurcated into solution and service. In terms of deployment type, it is divided into on-premises and cloud. On the basis of enterprise size, it is segregated into large enterprises and small & medium enterprises (SMEs). The applications covered in the study include disaster recovery & business continuity, risk & compliance management, crisis communication, incident management & response, and others. Based on end user, the market is segmented into banks, insurance companies, and others. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The report analyses the profiles of key players operating in the market include 4C Strategies, CURA Software Solutions, Everbridge, IBM, Konexus, LogicGate, Inc., MetricStream Inc., NCC Group, Noggin, and SAS Institute Inc. These players have adopted various strategies to increase their market penetration and strengthen their position in the industry.
