Abstracts

The bone health supplements market was valued at \$13,745.5 million in 2024 and is estimated to reach \$23,081.56 million by 2034, exhibiting a CAGR of 5.3% from 2025 to 2034.

Dietary products that offer essential nutrients to improve bone strength and bone density are called bone health supplements. These supplements help manage conditions such as arthritis, osteoporosis, and age-related bone loss. These supplements also maintain the overall skeletal health of the patient.

Increase in prevalence of bone-related disorders, rise in health awareness, and surge in aging population boost the growth of the bone health supplements market. These supplements are available in the form of softgels, gummies, and others, which increase their popularity among the end users. Furthermore, changes in lifestyle and poor dietary habits reduce bone strength which results in the rise in demand of bone health supplements, thus boosting the market growth.

However, bone health supplements are available at a higher cost in the market. Also, there is an increase in the availability of counterfeit products in the market. These factors limit the growth of the market. There is an increase in awareness of preventive

healthcare among the people. This increases the adoption of bone health supplements to strengthen bone strength. In addition, there is also an increase in the participation of sports and fitness activities, which also increases the consumption of these supplements. In addition, initiatives by the government and recommendations from healthcare professionals also foster the demand for bone health supplements in the market.
