Cannula Market Expected to Garner \$316.9 Million by 2033, Growing at a CAGR of 6.7%

Abstract: The global cannula market is expected to grow primarily due to the rising prevalence of chronic diseases and the increasing awareness & adoption of minimally invasive procedures. The North America region is predicted to witness profitable growth by 2033.

As per the report published by Research Dive, the global cannula market was valued at \$171.9 million in 2023 and is expected to register a revenue of \$316.9 million by 2033 at a CAGR of 6.7% during the forecast period 2024-2033.

Dynamics of the Market

The rise in surgical procedures, including minimally invasive, cosmetic, and cardiovascular surgeries and the growing prevalence of chronic diseases are expected to make the cannula market a highly profitable one in the forecast period. Besides, the rising medical tourism is predicted to boost the market growth.

However, according to market analysts, the high cost of cannula devices and the limited healthcare resources in certain regions might restrain the growth of the market.

Advances in material science and manufacturing technologies have led to the development of more advanced and specialized cannulas, which is predicted to offer numerous growth opportunities for the market in the forecast period. Moreover, the demand for personalized medical devices tailored to individual patient needs is increasing, which is expected to propel the cannula market forward in the coming years.

Key Players of the Market

The major players of the cannula market include Medtronic, Edward Lifesciences, Becton Dickinson (BD), LivaNova, Boston Scientific Corporation, Smiths Medical, Terumo Corporation, Flexicare Medical, Fisher & Paykel Healthcare Ltd, and Medin Medical Innovations.
