Abstracts

Coating resins are resin covering applied on the surface to achieve hardness, corrosion resistance, weather resistance, and stain resistance. Resins offer quick drying times, gloss retention, and superior weathering to coatings. Surge in demand for green and eco-friendly coating across the world drive the growth of the global coating resins market. There is an increase in the demand for low VOC coating products owing to the stringent regulation development for low VOCs emission in the developing countries. This boosts the growth of the market. Furthermore, rise in demand for coating in automotive and furniture industry is anticipated to boost the global coatings resins market during the forecast period. However, fluctuation in the raw material prices restrict the market growth. Conversely, the development of bio-based coatings are anticipated to offer new opportunities for the key players.

Based on resin type, the market is divided into acrylic, epoxy, polyurethane, alkyd, vinyl, unsaturated polyester resin, saturated polyester resin, and others. Based on technology, the market is categorized into waterborne, conventional solvent borne, high solid solvent borne, powder coating, radiation cured, and others. Based on application, the market is classified into architectural, industrial, protective & marine, automotive OEM, vehicle refinish, and others. Based on region, it is analyzed across North

America, Europe, Asia-Pacific, and LAMEA.

The key players operating in the market include Bayer AG, Royal DSM, The Sherwin-Williams Company (The Valspar Corporation), and Polynt SpA. Other prominent players include Allnex Belgium SA/Nv, Arkema S.A., BASF SE, Momentive Specialty Chemicals, Inc., The DOW Chemical Company, and Evonik Industries AG.
