Abstracts

Container and Kubernetes security is a process of securing and deploying cloud-native infrastructure & applications. The container and Kubernetes security is essential throughout the container lifecycle, owing to dynamic and distributed nature of Kubernetes cluster. Rise in concerns related to vulnerabilities and cyberattacks across the globe and surge in popularity of microservices are expected to drive the market growth. However, misuse of container images and various communication and network laws restrain the market growth. Further, increase in implementation of hybrid cloud technology across prime vendors is expected to provide lucrative opportunities for the container and Kubernetes security industry during the forecast period.

The container and Kubernetes security market is segmented on the basis of product, components, organizational size, and industry vertical. On the basis of product, the market is fragmented into cloud and on-premises. Based on components, the market is segregated into container security platform and services. By organizational size, the market is divided into large enterprises and small & medium enterprises. From industry vertical, the market is fragmented into BFSI, retail & consumer goods, healthcare & life

science, manufacturing, IT & telecommunication, government & public sector, and others.

The key players operating in the market include Alert Logic, Aqua Security, Capsule8, Cloud Passage, Nev Vector, Qualys, Trend Micro, Twist lock, StackRox, and Sysdig are provided in this report.
