Abstracts

The global dewatering pumps market size is expected to reach \$10,133.4 million in 2026 from \$6,374.1 million in 2018, growing at a CAGR of 5.9% from 2019 to 2026.

Dewatering is a process that helps to eradicate water from solid material or soil through centrifugation, filtration, wet classification, or alike solid-liquid separation methods. A dewatering pump is specially designed to handle sediment-laden water from a construction site, sediment basin, or an excavated area.

Several benefits offered by dewatering pumps such as abrasion resistance & enhanced operational proficiency and implementation of stringent energy-saving government regulations to monitor the manufacture of pumps are the key factors that propel the growth of the global dewatering pumps market. In addition, rise in construction activities globally is projected to fuel the development of the industry. Moreover, worldwide increase in consumption of oil & gas products is expected to boost the market growth. However, uneven prices of raw materials is the major challenge faced by the vendors operating in the dewatering pump industry, thereby hampering the market growth. On the contrary, upsurge in demand for water & wastewater management is anticipated to offer lucrative opportunities for the players in the dewatering pumps industry.

The global dewatering pumps market is segmented based on type, application, and

region. On the basis of type, the market is categorized into the submersible dewatering pump and non-submersible dewatering pumps. The submersible dewatering pump segment is anticipated to dominate the global dewatering pumps market in the upcoming years. By application, the market is segregated into construction & agriculture, oil & gas, municipal, mineral & mining, and others. The construction & agriculture segment is projected to dominate the global dewatering pumps market throughout the study period.

The global dewatering pumps market is analyzed across four geographical regions, which includes North America (U.S., Canada, and Mexico), Europe (Germany, France, UK, Russia, and rest of Europe), Asia-Pacific (Japan, China, Australia, India, and rest of Asia-Pacific), and LAMEA (Latin America, Middle East, and Africa). Asia-Pacific is expected to hold the largest market share throughout the study period, however, LAMEA region is expected to grow at the fastest rate.
