Diabetic Footwear Market Overview:

The global diabetic footwear market is projected to reach \$9,904 million by 2025, registering a CAGR of 8.7% from 2018 to 2025. Diabetic footwear is also known as extra depth shoes. These are therapeutic shoes which help improve and maintain the foot health by reducing the damage caused by skin breakdown of patients suffering from diabetes and are diagnosed from foot deformities. The key aspect of diabetic footwear is to prevent foot injuries from frequent mobility with the help of a removable shoe insert and insole, which are made up of stretchable material for adjustability and customization.

The growth of the diabetic footwear market is influenced by the rise in prevalence of various forms of diabetes, which results in huge expenditure toward the diabetes treatment, escalating population in the developing countries, and the rise in per capita income of individuals. However, lack of awareness in the general population in regards to the use of diabetic footwear and counselling for proper foot care is expected to restrain the growth of the global diabetes footwear market.

Production and availability of innovative and new diabetic shoes in the U.S. are the factors that strengthen the growth of the North America diabetic footwear market. Moreover, rise in disposable income in emerging countries, such as China and India is expected to increase the demand for diabetic shoes in the Asia-Pacific region.

The market is segmented based on distribution channel, end user, type, and region. Based on distribution channel, it is classified into online platform, specialty store, footwear store, and others. Based on end users, it is bifurcated into women and men. The women and men subsegments are further bifurcated into diabetic footwear for women and diabetic footwear for men. Based on type of footwear it is divided into shoes, sandals, and slippers. Based on region, it is analyzed across North America (U.S., Canada, and Mexico), Europe (UK, Germany, France, and rest of Europe), Asia-Pacific (India, China, Japan, and rest of Asia-Pacific), and LAMEA (Latin America, Middle-East, and Africa).

The online platform is expected to gain huge market share, owing to the increase in penetration in terms of internet & smart phones and the growth of the e-commerce industry. Key players profiled in the report include Podartis Srl (Italy), DJO Global Inc. (U.S.), Aetrex Worldwide, Inc. (U.S.), Dr. Zen Products, Inc. (U.S.), Orthofeet Inc. (U.S.), Propet USA, Inc.
