## **Abstracts**

Digital transformation is a method of using digital technology for changing current business approaches into more advance and technologically driven business approaches for increasing customer satisfaction and to enhance revenue opportunities. In addition to this, various banks, fintech and insurance companies are adopting digital banking platform for increasing transparency among the enterprises and to building more trust among the employees. Furthermore, various insurance companies across the globe are adopting digital transformation to increase productivity of employees as well as to save time and resources of the company.

The key factors that drive the growth of the global digital transformation in BFSI market include increase in adoption of digital technology by various banks and surge in need of digital services among the fintechs to enhance and to improve the customer experience. In addition, increase in customize IT solutions for specific banking need positively impacts the growth of the market. However, high implementation and maintenance cost of digital technology and security & privacy concerns related to data theft and cyber-attacks is expected to hamper the market growth. On the contrary, increase in adoption

of advance technology such as AI and machine learning among the companies is expected to offer remunerative opportunities for the expansion of the global market during the forecast period.

The global digital transformation in BFSI is segmented on the basis of component, deployment model, enterprise size, end user, technology and region. In terms of component, the market is segmented into solution and service. By deployment model, the market is divided into on-premises and cloud. In terms of enterprise size, the market is segmented into large enterprises and small & medium enterprises. As per end user, the market is bifurcated into banks, insurance companies and others.
