Abstracts

In recent days government are setting stringent rules to control the emission of harmful gases from engines and meet the emission standards. End-users such as automotive, marine, off-highway, rolling stock, and industrial equipment are responsible for release of greenhouse gases such as nitrogen oxides, unburned hydrocarbons, and others into ecosystem. Technology such as diesel particulate filters (DPF), gasoline particulate filter (GPF), diesel oxidation catalyst (DOC), selective catalytic reduction (SCR), exhaust gas recirculation (EGR), and others are used to control the harmful emission and meet the emission standards

The emission control technology has witnessed significant growth over the years, owing to government rules regarding emission standards.

The emission control technology market report is segmented based on technology, fuel type, end-user vertical, and region. Technology is categorized as diesel particulate filter (DPF), gasoline particulate filter (GPF), diesel oxidation catalyst (DOC), selective catalytic reduction (SCR), exhaust gas recirculation (EGR), and others. Fuel type is

divided into diesel and gasoline. End-user vertical is classified as automotive, marine, off-highway, rolling stock, and industrial. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The key players analyzed in the emission control technology market include BASF, Clean Diesel Technologies, Inc., Clariant, Cormetech, Corning Incorporated, DCL International Inc., Johnson Matthey, Tenneco Inc., Umicore, Walker Exhaust Systems, and others.
