Abstracts

Enterprise application are software designed to meet the unique needs and objectives of the organizations. It includes applications such as CRM, ERP, SCM, BI, BPM, CMS, and EAM etc. Traditionally, enterprise applications were designed and developed specifically for back-office transactional activities such as accounting, production and inventory control and order management etc. However, in today's business context, the role of enterprise application is changing from back-office activities to business process improvement. Enterprise application is gaining importance as companies look to enhance their internal processes and systems by quickly responding to the challenges such as high cost and lead time incurred during business process. Adoption of enterprise applications enables easy flow of business information within or outside of organization. To gain competitive advantages such as customer interaction and integration of business functionality, most of the enterprises are implementing enterprise applications. Furthermore, emerging trends of cloud and increased access via mobile device are propelling the market growth. High cost and availability of open source

applications in the market are the major challenges for market growth. Rapid changes in business model, geographic expansion of businesses and increasing penetration of cloud technology would open numerous opportunities for the market.

The market is segmented on the basis of the solutions, delivery model, verticals and geography. The solutions segment includes CRM, ERP, SCM, BI, BPM, CMS, EAM, Web conferencing and others. Among all solutions, CRM is becoming popular as it is useful to manage interaction with customers and employees. Delivery model segment is further classified into on-premise and cloud based models. The vertical segment includes Manufacturing & Services, BFSI, healthcare, retail, government, aerospace and defense, telecom and others. The market is addressed in various geographical regions such as North America, Europe, Asia-Pacific and LAMEA in order to gain the competitive insights.

Key players in the market include Oracle, IBM Corp., Microsoft Corp., SAP, HP, QAD Inc. IFS AB, Epicor Software Corp., Infor, and Salesforce Inc. among others.
