Abstracts

Cleanroom is typically an aseptic environment or an environment wherein strict limitations and control is maintained for particulate matter, contaminants and pollutants. Maintenance of aseptic and contaminant-free environment is a core regulatory and mandatory requirement for industries such as pharmaceutical, semiconductor, medical devices, and food. Cleanroom disposable gloves are primarily used in these industries as the protection tool to avoid cross contamination of the manufactured products. These gloves are manufactured from various materials such as natural rubber/latex, nitrile, vinyl, and neoprene. Cleanroom disposable gloves are specially designed to suit the standard operating procedures (SOPs) mandated and regulatory cleanroom apparel standards. The cleanroom gloves offer benefits such as high tactile sensitivity, diverse lengths that include rolled cuffs, and high thickness. Natural rubber cleanroom disposable gloves are widely used in the market, as they are the most-conventional and provide highest level of comfort and ergonomic fit.

The European cleanroom disposable gloves market was valued at \$180 million in 2015 and is estimated to reach \$318 million by 2022. A large base of customers (pharmaceutical industry, medical devices industries and semiconductors industry), mandatory imposition of cleanroom regulations, development of cleanroom-customized

variants of gloves and rapid increase in cleanroom spaces are driving the growth of the European cleanroom disposable gloves market. However, deployment of industrial robots in semiconductor industries could hinder the market growth. The European cleanroom disposable gloves market studied in this report is segmented by type of material, end user, and country. Based on types of material, it is sub segmented into natural rubber gloves, nitrile gloves, vinyl gloves, neoprene gloves, and others. Based on end user, it is categorized into aerospace, disk drives, flat panels, food, hospitals, medical devices, pharmaceuticals, semiconductors, and other industries. The market by country is segmented into Germany, U.K., France, Italy, Spain, and rest of Europe.
