Abstracts

Dehumidifier is a household appliance that controls the level of humidity in air, and thus improves the air quality within the room. In addition, it used to eliminate musty odor due to increased humidity levels in the air, thereby maintaining health and improving comfort. Furthermore, installation of dehumidifiers make residential, commercial, and industrial places less hospitable for the growth of allergens such as dust mites, mold, and mildew.

Rapid development in the real estate sector has led to rise in construction of residential buildings, which acts as a key driving force of the Europe dehumidifier market. In addition, increase in awareness toward health and changes in weather conditions are the major factors expected to augment the demand for dehumidifiers. Moreover, rise in awareness about the benefits of maintaining indoor air quality is anticipated to boost the market growth.

However, high cost of dehumidifiers and the seasonality of the product majorly restrain the market growth. On the contrary, improvement in standard of living and increase in disposable income of consumers are expected to provide lucrative growth opportunities for the expansion of the market during the forecast period.

Furthermore, the Europe residential dehumidifier market is anticipated to witness strong growth during the forecast period, owing to the development of the industrial sector, continuous growth of the economy, and upsurge in construction activities in the domestic sector.

The market growth is further driven by consumer awareness; increase in awareness of condensation problems on windows or walls that lead to decaying of window frames and foul odor, intensive promotional activities that include penetration pricing policy by manufacturers, and wide availability of dehumidifiers notably contribute toward the growth of the market.

The Europe dehumidifier market is segmented into type, application, and country. Depending on type, the market is bifurcated into refrigerant type dehumidifier and chemical absorbent dehumidifier. On the basis of application, it is segregated into industrial, commercial and residential. Country wise, it is analyzed across Germany, France, Spain, UK, Italy, and rest of Europe.
