## Abstracts

The Europe fly control chemicals market for household waste accounted for \$1,416.2 million in 2018, and is anticipated to reach \$2,245.3 million by 2026, registering a CAGR of 5.8% from 2019 to 2026.

Waste is generated during the extraction of raw materials, processing of raw materials into intermediate & final products, consumption of final products, agricultural activities, and other human activities. Waste management is a systematic procedure of treating waste, comprising numerous activities such as collecting, transportation, and treatment (mechanical/biological/chemical).

The growth of the Europe fly control chemicals market for household waste is driven by factors such as increase in environmental awareness and implementation of stringent government regulations toward open dumping. However, along with difficulties in storage and handling of insecticides, high prices of insecticides is a major factor

expected to hinder the market growth during the forecast period.

The Europe fly control chemicals market for household waste is segmented based on type, waste treatment method, method of application, active ingredient, and country. Depending on type, the market is bifurcated into larvicide and adulticide. On the basis of waste treatment method, it is classified into mechanical biological treatment (MBT), anaerobic digestion. By method of application, it is segregated into toxic bait, dichlorvos vaporizer, outdoor space-spraying, larvicide sprayers, and others. Toxic bait is further categorized into dry scatter bait, liquid sprinkle baits, and liquid bait dispensers. As per active ingredient, the market is fragmented into organophosphorus compounds pyrethroids compounds, neonicotinoids, and insect growth regulator.

Organophosphorus compounds is further classified into azamethiphos, diazinon, dimethoate, pirimiphos methyl, and others. Pyrethroids compounds is subsegmented into bioresmethrin, cyfluthrin, deltamethrin, pyrethrins, and others. Neonicotinoids is further classified into imidacloprid, thiamethoxam, and others. Insect growth regulator is bifurcated into cyromazine and others. Country wise, the market is analyzed across Germany, France, the UK, Italy, Spain, Nordic countries, the Netherlands, and rest of Europe. The Nordic countries are analyzed across Denmark, Finland, Norway, Sweden, and rest of Nordic.
