Abstracts

The extreme tourism market was valued at \$30,465.1 million in 2024 and is estimated to reach \$99,670.6 million by 2034, exhibiting a CAGR of 12.6% from 2025 to 2034.

Travel experiences that push individuals to engage in activities that involve risk, extreme environments, and endurance such as paragliding, desert survival tourism, skydiving, and travel to polar regions are referred to as extreme tourism. This type of tourism is being preferred by millennials and affluent travelers to gain once-in-a-lifetime experience. People who love to opt for extreme tourism prefer remote landscapes, deserts, icy terrains, and more that provide such experiences to the travelers.

Rise in demand for adventure-oriented travel experiences among people is the major factor expected to boost the growth of the extreme tourism market. Tourists, these days, seek thrilling, offbeat experiences during travel. They do not wish to travel to relax or escape routine, they wish to travel to gain adrenaline rush, which can give their travel a thrill and an experience that they can never forget. Such types of expeditions include river rafting, arctic expeditions, bungee jumping, and more that challenge the emotional and physical capabilities of the travel. This factor boosts the growth of the extreme

tourism sector.

Influence of social media also plays a key role in fostering the growth of the extreme tourism market. Tourists visiting places share their images and videos which inspire the young travelers to take up the task and choose the destination. The travelers are majorly being attracted to the activity offered by their destination. This fosters the growth of the extreme tourism market.

In addition, initiatives by the government to develop remote areas that provide adrenaline rush activities also play a major role in boosting the market growth. Expansion of infrastructure in these areas along with provision of resorts and lodges by the government for the tourists boosts the interest of the travelers toward the destination. Moreover, the destinations are equipped with specialized training institutes which teach the tourists the basics of the interested activity and explain about safety measures related to the activity.
